

Uh-huh.

(You ever hear anything like that?)

Well, they said this old man that we talked about. They said he was that way.

He--you know, Mr. Whitehorn always tell that story, you know. That he had power and lot of well--way I understand that--oh, I think he lost his only boy he had, I think. And then he went out and fast for so many days, you know.

They said, and then when he was going to go back to the camps, well, he fell and said that, I guess flies must got in his nose you know, worms, you know.

They said that this crow that flies around us, that he cleaned him up, you know, and he could understand that crow and then said sometime he had--while

he was under that, I guess, he heard a voice, I guess, and he said it was

Jesus, you know, where he got the power, you know. Gave him power to make it back to his people, they said. So that's way. But I just hear. I don't know

that even. Just hear. Simon always tell us, you know, when he was living.

But that's all I know. But Mr. Whitehorn knows more about that, you know, what--he could explain it more--clearer than I would, you know.

MARKINGS WHICH MEAN WISH FOR LONG LIFE

(Now back--back in them days, too, did--did all--did her or whether your folks or grandparents that had these that--I remember on my grandparents, they had these markings.)

Uh-huh.

(On them too--)

Uh-huh. L

(And I never did understand what they meant, or what they stood for. Did they have any special use? Did they have a use?)

Yeah, they had special things for that.

(They did.)

Uh-huh.

(Could you tell us a little bit about what they were for?)
