

No, it has changed very little. There's a few individuals.

(A few individuals have gotten a pretty good deal, but as a whole--)

But you're speaking about them treaties. Them treaties, well, that's the way ninety per cent of them treaties--or maybe more than that per cent of them treaties--was because the chief don't know a damn thing.

(That's right.)

He's ignorant as a wild hog. They talk to him and while they're talking to him then they--if he don't sign this treaty, well there's going to be war.

(Yeah.)

We're going to kill 'em. And which I guess they--

(And the Indians thought he was doing the right thing, too.)

Yep. That smooth talk--

ADMIRES KENNEDY BROTHERS

(Well, the history of the Indian has been a pitiful thing. It's been a tragic thing for America.)

Well, you take getting this last money. Them set of lawyers, they had a lot of things to go on in their favor. And I think that them two Kennedys, without them two Kennedys, we wouldn't have never got that money. Robert Kennedy he fixed the thing so they couldn't file any claims against that money. And if it hadn't been for that, we never would have got the money. Never would.

(Well there wasn't very much money, but it helped, all right.)

Yes. It helped.

(It helped a lot of folks.)

PREDICTS INTEGRATION OF ALL PEOPLE

Yes sir. Well in time maybe we'll know. People will be mostly equal, I believe.

(In time they will.)
