

Huh?

(Any of the Daughtery's still living around?)

No.

(Or are they all gone?)

Let's see. I think they're all gone.

(Well.)

That Willie Daughtery he's got a boy. He used to stay down there with Granny Buzzard. He used to be about (not clear)--

SECRETS KEPT CONCERNING TREATMENTS FOR VARIOUS AILMENTS

(Buddy, a long time ago, did people have arthritis like they do now?)

No I've talked to a lot of them about that. I never did know. Well once in a while you'd hear, some old person. He'd get crippled, you know. Kind of limp. Limping around. He had rheumatism. I never had any arthritis. Just heard in the late years.

(Well did the Indians have a remedy for that rheumatism?)

I don't think so.

(Well you know they had a remedy for about everything.)

Well they might have for that too.

(Yeah.)

But they was kind of funny about that. If they--if you had something wrong with you, and they wanted to help you, well they probably could.

(Yeah.)

Make up medicine for you. You get all right. But you never would know what it was.

(That's right.)

Wouldn't know what it was. That got you all right. They didn't leave it with anyone.

(No they wouldn't do that.)
