

Well that was located, was you ever through here when the railroad was here?

Well it was just this side of there. And when I first come here even the old logs, it was a double log house, was there still yet. But later years there wasn't a scrap left. I don't know whether some of them carried them off or what.

(Probably so. Well this is a historic old place, Salina,)

Yes it is.

SALT SPRINGS

(Now is this where they used to have the salt springs?)

Yes, and you know they fixed concrete for that highway. And just left the spring down there. They told me they were going to build a concrete wall around there so high that they could flow over, you know. But they never did.

(Well they are lost now forever.)

Oh and that was just good medicine that salt water was. Charlie's mother lived down there. She always carried a pint cup in the wagon. Folks had wagons in them days. And she'd git that cup out and drink almost a pint of that water. She'd say "Fannie you ought to drink some of this its good medicine." She'd do it everytime. We'd go down there every spring and take them hot baths. And we all thought that would help us through the summer.

(Well it must have helped because so many people said they benefited from it.)

Yes, you know it and we never missed. Just once since then I've gone over to (unclear). But I don't have a way over there getting over there now.

There was logs about like this. Had a hole clear through the middle. I could run my fist clear through there. And it was sharpened off on the end and stuck in the other one. And I could pipe that water all over that lake.
