A Good String of Fish is Never Carried up a Side Street!!

THAT'S WHY THE OWNER OF A

BRUNSWICK-BALKE-COLLENDER CO.

TABLE IS ALWAYS PROUD OF THE BRAND,
AND PLEASED TO MENTION THE
NAME OF THE MAKERS

HISTORICAL

A SKETCH of the origin and subsequent development of the greatest billiard table company in the world, would excellently serve as a biographical family history of John M. Brunswick, Julius Balke, H. W. Collender, M. Bensinger and A. F. Troescher.

The Brunswick-Balke-Collender Co.

HISTORICAL CONTINUED

is at present, as it always has been, distinctively a family concern. Every dollar in the company is owned by the families of the original founders.

B. E. Bensinger, grandson of John M. Brunswick, is now president. He is of the third generation in the Brunswick family, prominently connected with the world famous old house of The Brunswick-Balke-Collender Co.; B. H. Brunswick, First Vice-President; A. A. Troescher, Treasurer; are all descended from the original founders. They have devoted their lives, as did their fathers before them, to the manufacture of billiard and pool tables. The slightest deterioration in quality would be considered by them as equivalent to a blemish on the family name.

By reason of the fact that every dollar in the company is owned by members of the family, there is only one interest. The officers are not compelled to sacrifice quality for profits to satisfy a horde of hungry stockholders. That is why their tables are the best in the world, as they have been for the past sixty years.

THE WISE FARMER AND THE HIDDEN TREASURE.

A FARMER being on the point of death, wished, so saith Aesop, to insure from his sons the same attention to his farm as he had himself

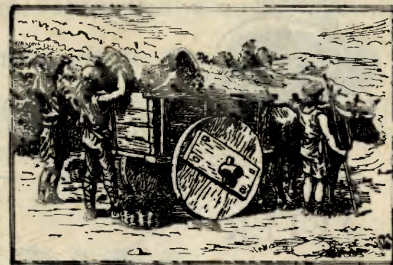

given it. He called them to his bedside and said: "My sons, there is a great treasure hid in my vineyards."

The sons lost no time in digging over every portion of the farm. They found no gold, but the unwonted stirring of the soil caused the vines to bring forth such an extraordinary and

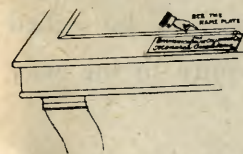

superabundant crop that they were moved to exclaim with one accord, that the treasure referred to by their sire was discovered.

Same way with that old billiard or pool

table which you have and which is bringing you but little income.

There is a fortune concealed in its antiquated frame work. Get to work and dig it up by giving it a thorough renovation and course of repair. Overhaul it and keep it in condition and it will yield a crop of profits that will

Look at the Name Plate.

astonish you. Don't be discouraged by its age. Look at the name plate and remember that if it is a Brunswick it has a foundation of quality that cannot be surpassed. With a little expense and untiring effort on your part, you can make its playing qualities fit for the patronage of the king of billiards. When you do so it will enable your customers

to accomplish results that will win their favor and bring forth the hidden treasure as did the delving of the farmer's sons at the roots of the grape vines.

AFTER YOU HAVE DECIDED

to put the much neglected billiard or pool table into condition you will doubtless look around for some concern who can be relied upon to furnish what you require in the way of repairs.

Should you elect us to supply your necessities, you may want to know something about our ability to fill any order you may give us.

We are too modest to tell you that we have the largest, most complete and best appointed billiard table and supply manufacturing plants in the universe.

We think, however, that you are entitled to know all about us in this respect, consequently we show on the following page

photographic reproductions of our principal factories and warerooms throughout the world, and we will let you be the judge as to whether or not we can give you the best billiard goods that skilled mechanics and perfected appliances can produce

The Monarch cushion sets the pace for quality and is the guiding star for all that which excels in Billiards.

The above illustration shows our immense factories at Long Island City, Chicago, Muskegon, Cincinnati, San Francisco, Toronto, Ont., and Paris, France.

IT REQUIRES QUALITY TO KEEP A

CONCERN IN THE FRONT RANKS

FOR SIXTY YEARS

Along this line we might say a great many things about ourselves, but whenever we have an inclination to talk about our unsurpassed facilities, we are reminded of the fabled game cock, who rounded up and cleared the barnyard of his rivals, and then crowed so loudly over his conquest that he attracted the attention of a hawk, after which the game cock's haunts knew him no more.

We always bear this in mind. The fact is, we are too modest to crow. We just want to make enough noise to inform our billiard friends that we are not asleep to the requirements of billiard interests.

If we can be of service to you in any way, let us hear from you.

All goods quoted in this list are sold on the **MAIL ORDER PLAN**. Prices are based on close margin and they are strictly net, **NO DISCOUNTS**.

HOW TO ORDER GOODS.

BE particular to address plainly our full Company name on your envelope.

The Brunswick-Balke-Collender Co.

Orders from distant points and for heavy goods must be accompanied by a remittance sufficient to cover express charges both ways.

Small packages, not weighing over four pounds, can be transmitted by mail at considerable saving of carrier's charges, but we will ship orders by mail only when the bill and postage is prepaid by the purchaser.

Remember, that by remitting cash, draft or post-office order, with order as per price list, you save express charges for return of money.

When sending us articles by mail, write your address upon the outside and do not enclose any writing inside of package, but send us instructions by letter, thus saving yourself full letter postage on packages. Address all packages to **"The Brunswick-Balke-Collender Co."** From (here give your full name and address).

HOW TO REMIT MONEY.

We prefer that remittances be made to us (when possible) by EXPRESS MONEY ORDERS. They are absolutely safe, cost no more than other methods, are more convenient to us, and can be obtained at any Express Company's office.

If, however, it is not convenient to use Express Money Orders, remittance may be made by draft, registered letter, or Post Office Order.

Always make payable to the order of

The "Monarch" Cushions can be
relied upon for perfect rail nursing and
open Table play.

MONARCH CUSHIONS

**The Cushions that Built the Largest
Billiard Table Factories
in the World.**

**There is but One "Monarch" in
the Billiard Universe.**

Imitators have found the manufacture of a "speedy" cushion a comparatively simple matter. They have secured a cushion with a correct angle in some parts of the table, but they have never been able to overcome the more difficult problem of producing a cushion that would act in the center of the table precisely the same as it does nearer to the end rails.

MONARCH CUSHIONS.

Absolute accuracy of angle throughout the entire length of the cushion rail is an impossibility except by the method employed in the "Monarch."

Imitators have approached as close to the line of infringement as they dare, and there they have met an insurmountable barrier in the patents of the "Monarch," consequently

THEY HAVE NEVER BEEN ABLE

to produce a cushion that will act the same in all parts of the table, center, corner and ends.

**The Patents of the "Monarch"
have made it incontestably
secure against rivals.**

The foregoing is a commonplace explanation of the technical term of "Uniform Resiliency" used by experts in connection with the "Monarch." It is the fundamental principle of these celebrated patents, the most important ones of the many thousands of patents in the billiard line.

MONARCH IMPROVED QUICK CUSHIONS

LATEST PATENT

PRICE OF THE MONARCH
ATTACHED TO YOUR TABLE RAILS

5	x 10	Carrom, covered with No. 1 Simonis cloth	\$37 50
5	x 10	Pool, " " " 2 " "	35 00
4½	x 9	Carrom, " " " 1 " "	35 00
4½	x 9	Pool, " " " 2 " "	32 50
4	x 8	Carrom, " " " 1 " "	32 50
4	x 8	Pool, " " " 2 " "	30 00

Send us your old rubber and we give you credit for what it is worth.

IMPORTANT—To insure the correct action of the cushions, it is of the utmost importance that they be properly adjusted to the cushion rail, and we therefore require the rails at our factory or one of our branch house workshops, in all cases where new cushions are wanted.

RE-COVERING CUSHIONS

Cushions re-covered with new cloth, \$5.00 to \$7.00 depending upon quality of cloth selected.

NOTE—We are in a position to furnish cushions of any make on the market, if required, at lower prices than offered by others, and ranging from \$20.00 up.

In ordering, specify the name of cushion wanted.

N. B.—Where second-hand cushions will answer the purpose of the purchaser we can also furnish such at prices to meet any demand.

The Little Monarch Quick Billiard Cushions

PATENT, OCTOBER 18, 1898.

THESE are made on the same general principle as our Celebrated Standard Monarch Cushions, but smaller in size and, therefore, cheaper in price. The special characteristics of these cushions are

Unusual Rapidity

Absolute Accuracy of Angle

Greater Durability

Economy in Price

We invite comparison of these cushions with any other billiard cushion in the world offered by other concerns, either at the same or at a higher price.

Take note of the following quotations. No roomkeeper can now afford to make use of billiard cushions which are not perfect in every respect. The opportunity offered in the introduction of THE LITTLE MONARCH CUSHIONS, to get a strictly high-grade article that will give good results and at a moderate price, should be improved by every billiard man who wants to retain the patronage of his customers, by keeping his tables in first-class condition.

PRICE OF THE LITTLE MONARCH.

ATTACHED TO RAILS AND COVERED WITH CLOTH.

5	x 10	Carrom, covered with Superfine Samson cloth,	\$27.50
5	x 10	Pool, " " Extra " "	25.00

NOTICE!

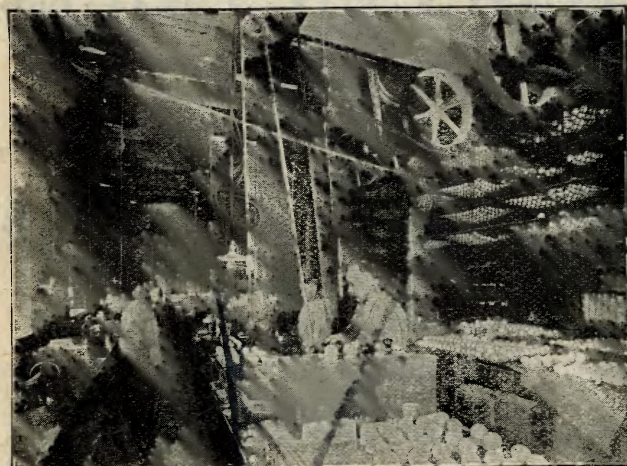

Canvas Cloth Discontinued

These goods were never recommended by us. We formerly quoted them merely to show that we could furnish the goods if wanted.

This cloth is extensively advertised by irresponsible concerns, who represent it to be a desirable article. It is nothing more nor less than common canvas or sail cloth, dyed green.

We consider its use well calculated to kill interest in Billiards and Pool. It creates dissatisfaction wherever sold, and we have therefore discontinued it.

The BRUNSWICK-BALKE-COLLENDER CO.

SPECIAL OFFER IN IVORY BILLIARD BALLS

ALL SELECT STOCK, NEW GOODS

LOT NO. 2 "S. C."

This assortment consists of three new ivory balls that have been slightly season checked or sand cracked in process of seasoning. They are sometimes more durable and better calculated to withstand sudden changes in temperature than the highest priced new balls.

2 3-8 inch size, per set of 3 balls.....\$24.00
2 5-16 " " " " 3 " 21.00

IVORY POOL BALLS

(16 TO A SET)

	Clear	Enameled	Season Checked and Sand Cracked
2 5-16 inch....	\$176.00	\$131.00	\$88.00 to \$112.00
2 1-4 "	160.00	100.00	64.00 " 80.00

We can furnish a limited number of Pool Balls (popular size), which have been remodeled from larger sized billiard balls, at a reduction of from 25 to 50 per cent from prices quoted above. Particulars on application.

We will take second-hand ivory balls in exchange, but we cannot estimate their value until we have an opportunity for examination. Their value depends entirely upon their size and condition, and their availability for turning them down to smaller sizes.

We will make liberal allowance for old balls sent in, and if our valuation does not prove satisfactory the balls can be redeemed within a reasonable time.

ELEPHANT TUSK IVORY BALL STOCK.

Advice on the Purchase and Care of Ivory Balls.

We advise and urge upon customers the exercise of great care in the treatment of Ivory Billiard and Pool Balls. We import the finest soft Zanzibar elephant tusk ivory, which is thoroughly inspected in our shops before being sent out; but ivory will break and split if exposed to varying degrees of temperature. We study the interests of our customers when we advise them to purchase ivory balls during warm weather, so that they shall be thoroughly acclimated to the room in which they are to be used before the unsettled weather of fall, winter or spring sets in. Purchasers must take all the responsibility and risk of damage on account of climatic changes. The balls leave our hands perfectly sound, and of the very best material, but we cannot guarantee them against breaking or splitting at any time of the year, particularly during the winter months. Avoid exposing the balls to different temperatures of heat and cold. Changes from cold to warm, or from warm to cold will usually injure and frequently crack them. Draughts from open doors and open windows striking the balls while in use on tables are quite apt to damage them.

We advise positively against the use of sweet oil for the preservation of ivory.

The oil simply discolors the ivory and makes the ball sticky and heavy, and causes the ivory to deteriorate.

When the balls are removed from the table, after having been in use, they should be wiped with a damp cloth or sponge and then rubbed thoroughly dry, for which purpose a piece of chamois is best suited. The use of alcohol is preferable for cleaning ivory balls, as it evaporates very quickly and therefore does not affect the ivory, no matter what the condition of the weather may be.

BILLIARD & POOL BALL REPAIRS

A Section of Our Ivory Billiard Ball Turning Department.

Ivory Billiard Balls sent us for repairs are never turned unless absolutely necessary. We make them round in most cases by truing from the side that is out of center and do not cut down the entire ball to get the desired result.

Ivory Billiard Balls that are badly chipped or which require special care or extra work to put in shape, will be charged for at an additional cost not exceeding \$1.00 per set.

SPECIAL NOTICE:
In case of ivory balls which have been saturated with oil, it is almost impossible to turn them down without danger of breaking out small pieces of the balls, due to the disintegration of the ivory, caused by the use of the oil. However, we employ the most skillful ivory turners in the country, and guarantee the best work possible under any and all circumstances.

Price of Boxes for 4 ball sets, each..... 1.25

THERE is no item of billiard table equipment that is of greater importance than the billiard cues.

Room-keepers are just beginning to realize the fact that a well balanced, perfect taper, hand-made billiard cue is absolutely essential to the games of billiards or pool.

The cheap turning-lathe product which has the same care devoted to it as is given to the turning of a broom handle, no more and no less, is being rapidly discarded.

Room-keepers are learning from experience that bargain-counter prices on cues is not a good investment.

Every cue that we offer for sale or furnish with our billiard and pool tables is produced in our own factories and made by trades-union mechanics who have been in our employ for many years. These men have become experts in this line of work. We employ no child or female labor and have no piecework. Every cue, from the plain No. 3 to the most elaborate, is shaped and tapered entirely by hand.

The abominably cheap make of cues offered by many billiard supply dealers who have no

factories, are produced by planing mill specialty makers, who turn out billiard cues, broom handles, base ball bats, golf sticks and jointed fish poles with equal impartiality. It is with them, only a question of quantity and price—quality cuts no figure. The printer who gets up the catalogue in which they are advertised attends to the quality part of the job. That's his business.

We don't make mop sticks! We don't make curtain poles, broom handles or fishing rods! We just make cues. That's why we know how to make perfect cues.

Our cues are hand-made. Everyone of them is shaped by hand to the graceful outlines and perfect balance which the good billiard player finds essential for effective work.

FANCY SOLID WOOD BUTT CUES

We are the only billiard table company in the United States which manufactures its own cues, and the space in our factories devoted to that purpose covers many thousand square feet.

Our stock of imported fancy woods for cue butts embraces the choicest selections from foreign markets of Rosewood, Cocobolo, Amaranth, Mahogany, Coraline, Zebra, Dagaine, Sapote, etc., etc.

Fancy cues vary in weight as do the woods from which they are made. A light-weight cue cannot be made from the heavier woods. State weight of cue wanted and leave selection of wood to us.

No other concern manufacturing billiard cues takes the same pains we do in selecting woods to produce the desired weight of cues.

This is a very essential feature to be considered when a properly balanced cue is desired.

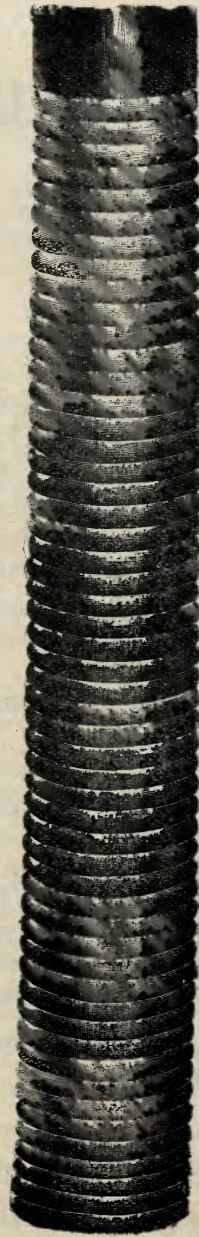

Our assortment of styles and designs of fancy wood butt cues is so extensive that it is impossible to enumerate them all. Besides, we are constantly adding new and original designs, and many of our customers prefer to stipulate, when placing their order, the amount they wish to invest, leaving the selection to us. We guarantee, in all such cases, that our selection will be satisfactory to the customer.

For Illustrations of Styles and Prices
See the Following Pages.

These Goods are hand-made, perfect in taper and strictly good quality in every respect.

FANCY WOOD CARVED BUTT CUES

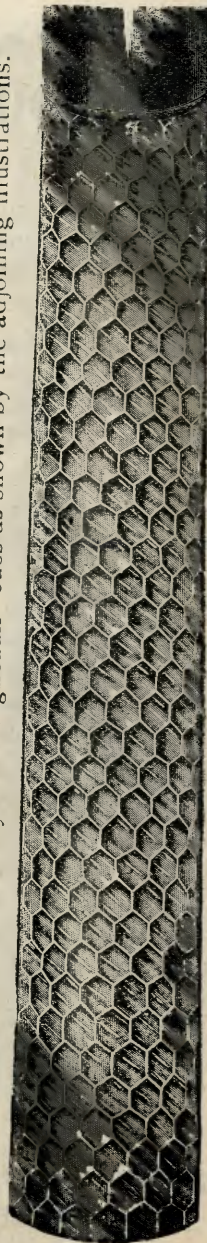

Any of the various styles of cues herewith described can be furnished with ivory joint in center of cue, ivory tip, and with name plate.

Cue Repair Work

ALL our billiard Cues, not excluding the very plainest, that we quote in our price lists and furnish with our tables, are shaped and given the graceful taper which characterizes them by skillful mechanics who are experts in this class of work. In addition to working up new cues in a great variety of styles, we also devote a great deal of attention in this department to Cue Repairs. A cue shaft that has become too short by splintering or breaking can be spliced out to any length and made good as new at a very small expense.

Second-hand cues can be retapered to any desired size of point and retipped. Ivory or hard fibre points can be put on at a very small cost. You really cannot afford to have a poor lot of cues in your billiard room. Send them to us for repairs. Tell us what is necessary and we will quote you price.

CUE TIPS

**IMPERIAL
MILANO**
CELEBRATED
ITALIAN CUE TIPS
Manufactured Exclusively For
THE BRUNSWICK-BALKE-COLLENDER CO.
CHICAGO. NEW YORK. CINCINNATI.

SHARP competition among French manufacturers of cue tips has, during the past few years, resulted in radical reductions in price and a corresponding depreciation in quality. The older school of billiard men have had good cause of complaint that cue tips are not what they used to be, without being reminded of the parable touching the pies that "mother used to make."

In order to get a good tip that could be relied upon to give satisfaction to our customers and that could be recommended as fully equal to the French tips of ten or fifteen years ago, we have been compelled to have recourse to an Italian product, which we believe to be the best cue tip ever put on the market. We have contracted for the entire output of this establishment.

The cost of this tip is much more, but is comparatively insignificant when taken into consideration with the annoyance and expense of the cheaper tip that is usually unserviceable and frequently out of condition.

How it is Operated.

"Combination Cue Cutter and Tip Clamp"

Patented Aug. 31, 1897.

The Combination Cue Cutter and Tip Clamp

A Cue Cutter is absolutely indispensable in the billiard room, and the combination style has the additional advantage of serving the double purpose of cutting the end of cue and clamping the tip while the glue is hardening.

ITALIAN BLUE BILLIARD CHALK

(MADE IN ITALY)

IMPORTED EXCLUSIVELY BY

THE BRUNSWICK-BALKE-COLLENDER CO.

Beware of imitations. None genuine unless having this label and the trade mark name "MONARCH."

This celebrated brand of imported Italian Billiard Chalk has long been held in high esteem by all of the leading billiard experts in the world, and has also found great favor among room-keepers who pronounce it very economical and always reliable.

It has very small waste as compared with colored chalk of American manufacture and is pre-eminently superior to all of the so-called imported Italian chalks, a majority of which are made in the United States and the balance in Germany. We have experimented with them all and unhesitatingly pronounce the Monarch Imported Italian Blue Chalk the best in the world.

Remember the name and the trade mark. Ask for this brand and no other.

No. 2 POCKET IRONS

(Continued)

**No. 2 Corner Iron,
Nickel-Plated
Projecting
Top Flanges.**

Corner Pocket Irons, No Leathers.

The irons are provided with extra wide flanges on ends and sides, to cover up any bad or open joints. They are especially used where new irons have to be fitted in the place of the old ones, and where there is any question about a careful fit. The exposed parts of the irons are handsomely nickel-plated, and they are provided with bolts.

	One Pocket	Six Pockets

No. 3. POCKET IRONS (CONTINUED)

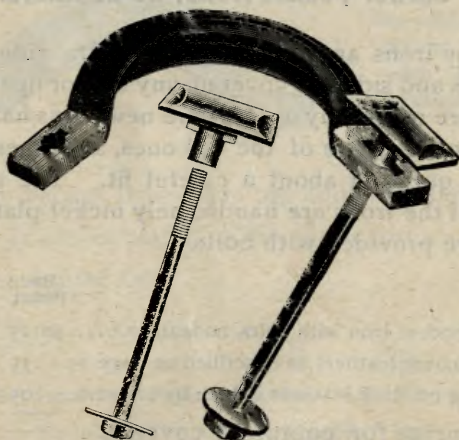

No. 3 Side Iron, Nickel-Plated Flanges, with Black Leather.

Bevel Edge Flange Pocket Irons

These are the same as the No. 2 iron quoted on preceding page, excepting the top of flange is beveled instead of round.

PRICE SAME AS THE NO. 2 STYLE.

No. 4 Pocket Irons with Movable Flange

No. 4 Pocket Iron, with Movable Nickel-Plated Flange.

This is the most perfect, durable and best appearing pocket iron yet introduced. As the cut illustrates, each flange is made in two parts, the top or ornamental portion of the flange being separated from the flange proper which fits into the rail of the table. It will also be noticed that the pocket bolt passes into the upper flange, thus relieving the flange attached to the pocket iron from any strain when the bolt is adjusted.

The advantage of this style of pocket iron over any other heretofore offered will be quite apparent. These pocket irons are made unusually heavy and strong, and yet should one become broken, it will be necessary to replace only the iron with the rough flange (at a merely nominal cost), as the ornamental flange will never break and can always be used should the pocket iron have to be replaced as described.

FOR PRICE SEE SUCCEEDING PAGE.

No. 4 Pocket Irons, only without flanges or
cover leather15 .90

NOTE—Any one of the cheaper grades of pockets, leathers, fringe, etc., can be substituted in the foregoing, if desired.

No. 5 POCKET IRONS

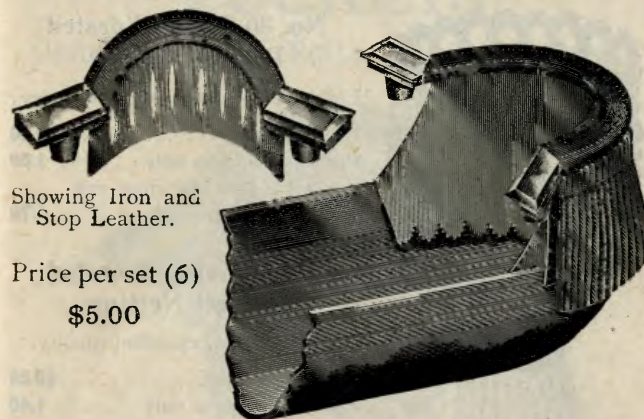

This style of Pocket Iron is used only on our higher grade of Pool Tables such as the Pfister, Warwick, etc. As may be observed from the above cut it has a shape peculiar to itself, differing from all other styles. Instead of being bolted in place on top of the cushion rail it fits into the ends of the rail at either side of the pocket opening. It has unusual strength and is of course a considerable improvement in appearance as compared with the other forms.

How to Set up a Billiard or Pool Table.

FOR convenience in reference we have shown on page 79 a sectional view of a pool table. In this diagram all parts are marked by letter simply for convenience in reference.

NOTE:—In some of our billiard and pool tables we are shipping the frame work of the body of table *i. e.* the parts A, B, and C, in one piece.

If the whole table is shipped in sections, to set in place, proceed as follows:

First place the legs and ends B, in the proper position on the floor, and bolt the sides No. A into them, as marked by the numbers 1-1, 2-2, etc. These numbers are stamped in the wood on top. Use bolts No. K, wrench No. L.

See that the tenons of the sides No. A are well down in the mortise at No. C, if not, knock them firmly in, taking care to put a piece of wood on top of the side to keep it from being bruised with the hammer. Next put in the stretcher or cross braces No. E, as marked. The table must then be leveled by putting pieces of wood of requisite thickness under the legs, until a spirit level and a straight-edge, the whole length as well as across the table, will show a perfect level. **Find the highest part and level the rest up to that.**

Now put on the slabs of slate, No. F, putting the slab marked "head" on the corresponding part of the frame which is also marked head. The slates must then be screwed down all around the edges first, and leveled again with a spirit level and straight edge. When this is done the screws in the middle are to be inserted and screwed perfectly tight. After all the screws are in and the bed satisfactory, fill up the screw holes and joints with plaster of paris, mixed to the consistency of thick cream and put on quickly, taking care to scrape the filling stuff perfectly even with the bed. When thoroughly dry, the whole must be made smooth with sandpaper. 15 to 30 minutes time is required for drying the plaster of paris.

Next put on the bed cloth, (we cover the cushions with cloth before shipment) with grain or nap running *from the head* towards opposite end of the table, and draw it as tight as possible, taking care that there are no wrinkles or creases. In putting on the cloth, tack it for a few inches at one corner, then pull the cloth tightly to the corner at the end of the table, same side, putting a few tacks to hold it while the whole of that side is being tacked; put the tacks about two and a half inches apart. When one side is done, do the same on the opposite side, pulling the cloth evenly and as tight as possible without tearing it; next tack the end and head of the table in the same manner.

Four chalk cups No. O should be screwed on the cushion rails before they are put on the table.

French Rail Billiard Markers

This marker is used exclusively at Paris and in many parts of Europe. It does not interfere in any way with the player, and the mechanism is fitted into the rail so that all that appears on the surface is a metal plate, in which the recording discs are placed. It is arranged with the units on one side and tens on the other, and is operated by pulling down a small knob at either end of the marker.

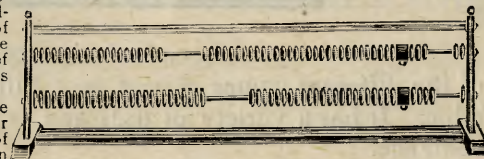

Price, per set.....\$10.00

Billiard Marker Stands

These are designed for private residence tables, or where it is not convenient or desirable to stretch markers above the table.

These stands are about 30 inches long and 6 inches wide. They are supplied with composition markers 50 to side. The metal base (by leaving off the frame) can be attached or suspended to the bottom of a cue rack when the latter forms part of the appointments of the room.

When desired we can furnish marker stand entirely of wood, finished in any style required.

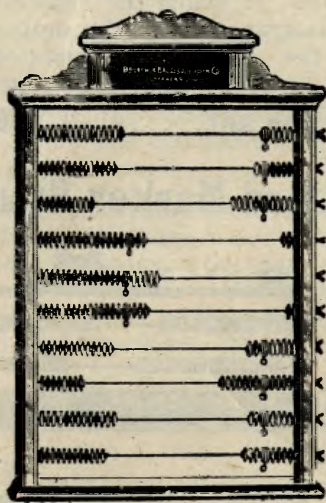

Plain Metal Stand, nickel plated with wood base	\$4.00
Plain Metal Stand, nickel plated, without base (for attaching to cue rack)	3.00
Ornamental Metal Stand, oxidized, with wood base	5.00

Carrom Plugs or Pocket Stops

For Altering Pool Tables to Billiard Tables

IN ORDER to make these Carrom Plugs fit correctly we will require exact diagrams showing size and formation of each pocket opening on table; where the cushions are cut through being the most important. This can easily be done by placing a piece of heavy paper on top of the cushion rails over the pockets and marking the outline of pocket from underneath, also numbering same, say from 1 to 6. We also require the exact height from bed of table to sharp angle of cushions, or better still, a pattern showing how the cushions are set.

CARROM PLUGS, adjustable, Monarch style, with iron fastenings, most perfect plug in the market (illustrated above), per set (6) \$15.00

PATENT CONVERTIBLE CUSHION RAILS

Patent No. 850,085, May 22, 1900. Patent No. 881,928, Nov. 13, 1900.

For Transforming Billiard Table to Pool or Pool Table to Billiard

This is a new invention the object of which is to provide a table that can be readily converted into either carrom or pool at will. Heretofore that has been accomplished only with the aid or use of Carrom plugs or pocket stops, but this new invention will be appreciated for the many advantages it possesses over any device heretofore introduced for the same purpose.

It is the only device by means of which a pocket or pool table can be converted into a carrom or billiard table, as perfect in every detail and particular as a table constructed for billiards alone.

As illustrated in the accompanying cut, this new arrangement consists of two separate sets of cushions, one intended for billiards and the other for pool.

The upper half of the cushion rail, that portion to which the rubber cushion is attached, is removable and when put in position, is firmly held in place by the aid of thumb screws operated from underneath the cushion rail. By loosening the attachment the top of the rail then in use can be detached and the alternate rail substituted, required but a few minutes time to make the change. The corner pocket irons are stationary but the side pockets are so arranged that the pocket irons can be turned back, to admit of placing the long carrom rail in front.

Any style or size of table can be fitted with these convertible rails. Old tables can be fitted with these rails, but it requires a complete set of new rails.

CHANGING BILLIARD TABLES TO POOL

SHOULD you desire to have the rails of your BILLIARD TABLE altered to POOL at any of our manufactories (which we would advise, as thereby the best of workmanship is secured), remove the rails from the table and ship to us by express or freight. If you ship by express it will not be necessary to box the rails. Wrapping them in burlap to protect against injury in transit will be sufficient for the purpose. We will cut the billiard rails to 6 pocket pool, furnishing new pocket irons, best worsted pockets, fringe and trim leathers, including boxing for shipment of the rails to you, at the net price of **\$15.00**.

It will not be necessary to ship the slate beds or the wood framework of the table to us. You can cut the slate slab for the 6-pocket openings, using a common saw for the purpose. When making return of the cushion rails to you we will furnish wood pocket pieces cut to the shape of the pocket openings.

By using these it will not be necessary for you to cut the slate pieces in circular shape. We furnish full and explicit instructions for this part of the work, which is really very simple.

Price of the wood pieces, per set of 6..... **\$0.75**

TIME AND PRICE REGISTER

The most convenient article that can be put into a billiard room.

A Clock, to which is attached a registering device, which indicates the exact amount due for use of the table whenever a game or series of games are ended. It can be adjusted to any price per hour the roomkeeper desires. In ordering a clock, roomkeepers should designate the rate per hour to be charged, so that the proper dial can be attached to clock. If the price per hour is to be changed at any time it can easily be done by substituting another registering dial.

This register can be used for any number of tables desired, and the Clock is an A. No. 1 timepiece.

You would not be without one after a single trial.

PRICE - \$15.00

THE AUTOMATIC TIME STAMP

Is used in Billiard Rooms in connection with tickets adapted to receive impressions from the stamp showing the name of the room or the proprietor, the hour and minute and the date when the game begins and when it is finished.

As the tickets are numbered consecutively, none can be lost or destroyed without the fact being known.

**PRICE
\$30.00**

FOR GENERAL USE, provided with a hard brass dial die engraved to order, the Automatic A. M. and P. M. printing device, and the selective word-printing cylinder, without words.

A locked cover, fitted to prevent the unauthorized setting of the clock, costs \$2.50

Cut one-half actual size.

Patent Pool Racks

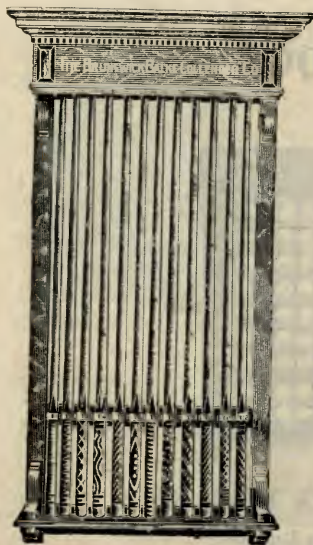

POOL COUNTER BALL RACK

(Our own Patent.)

The Pool Counter Ball Rack (our own patent) is the latest and best system for marking pool games. It is specially adapted for use in connection with pool tables fitted with our Patent Pool Trough Attachment. The rack is fitted with a number of spheres, eight in each row, parti-colored red and white, and which are intended to represent the balls pocketed by the various players during the progress of a game. At the commencement of a game all the white surfaces appear. As the players score, the marker turns the counters around until the red surface shows. Each red ball placed to a player's credit shows how many balls he has pocketed. When the game is ended, a simple movement of the lever shown in the engraving causes each red disc to turn simultaneously and only the white spheres are visible. This is one of the best inventions introduced in a billiard room for years.

Length, 42 in. Height, 68 in. Depth, 14 in.

Combination Cue Stand

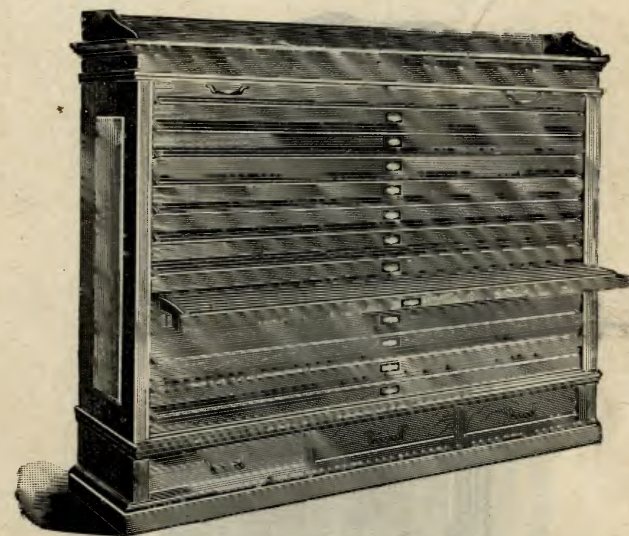

The upper portion has two rows of markers, fifty on each string, for ordinary billiards or pool, while directly beneath the "buttons" or markers is a full-sized pin-pool board of the latest and most approved design; under this is a ball rack for use in games of fifteen ball or continuous pool. The lower portion of the stand is enclosed, cabinet style, with two neatly paneled doors fitted with locks and keys. There is a drawer above the cabinet, also furnished with a lock and key, in which such small supplies as chalk, cue tips, sandpaper, etc., can be kept. The cue rack is arranged for the reception of six or twelve cues on either side of the stand, as may be desired. The entire outfit is constructed with particular regard to the requirements of private residences, for which it was especially designed.

The stand can be made without the cabinet or pin-pool board. The drawer, is nevertheless, retained in its present position, but where the pin-pool board is omitted the markers are considerably lower down. The entire structure does not occupy a space in excess of seven feet by four feet.

Combination Cue Stand, Cue Rack, Ball Rack, Pin-Pool Board, Billiard Markers, and Cabinet with drawer and cupboard all in one.

Oxford Cue Cabinet

Our Oxford Cue Cabinet is now extensively used in all of the largest billiard halls in the United States. It has a very large capacity and is especially designed for private cues. The drawers are arranged with a double slide attachment at either end, which makes them easy of access and prevents their tilting when pulled out the full width. The cues are laid horizontally in grooved receptacles made to conform to the hand shaped taper given to all of our fancy cues, so that there is no tendency in the cues to warp or get crooked.

These cabinets are furnished in handsomely figured quarter-sawed oak or to match the finish of the tables with which they are to be used.

Price.....\$90.00

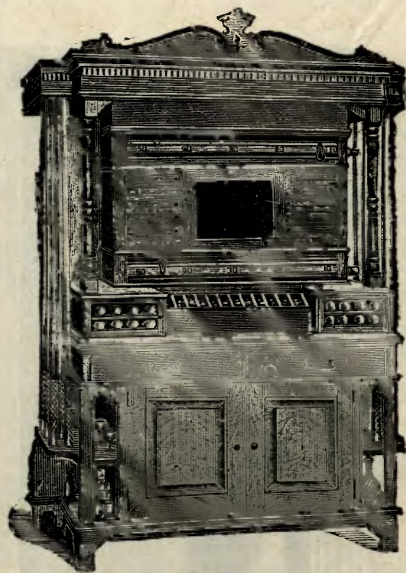

Length, 33 inches. Height, 63 inches. Depth, 17 inches.

The Utility Coat Closet and Cue Rack.

This style of cabinet and cue rack finds great favor among billiard men, by reason of its serving the double purpose of receptacles for coats, hats and making a handy cue rack, without the necessity for disfiguring the walls of the room with the conventional rack ordinarily used in smaller places. The cabinet is made so that it will accommodate one-half dozen cues on either end. The interior is supplied with coat and hat hooks.

It is made in handsomely figured oak, also in birch, finished in mahogany color.

Price, each.....\$24.00

Length 6 ft.-7 in. Height 7 ft. Depth 1 ft.-4 in.

English Billiard Room Cabinet

This cabinet is extensively used in connection with the finer class of residence billiard rooms. It makes a handsome and substantial, as well as very useful article of furniture, in that it combines all of the essential features of cue rack, ball rack, marker or counter rack, pin pool board, English life board, money box for English life game and a handy receptacle for all of the miscellaneous incidentals, such as billiard balls, brush, chalk, cue tips, leather bottle, triangle. It can also be made to serve the purpose of a sideboard or buffet. Doors of the cabinet are supplied with locks of good quality.

Made in handsomely figured quarter-sawed oak, but can be furnished in mahogany or any other wood desired.

THE PFISTER—One of Our Best.

Our Tables Are the Best in the World

For the reason that we have spared neither pains nor expense during the past Sixty Years to make them so.

IT is impossible to enumerate within the limits of a Catalogue all of the innumerable improvements embodied in our methods of construction incidental to the make-up of a perfect Billiard or Pool Table. Mentioned separately these improvements seem to be of a trivial nature, but taken collectively they make in the aggregate the very acme of perfection or as the professional player puts it, all of those little niceties which make billiard playing a pleasure and high scores not only possible but probable.

SEND FOR FREE CATALOGUE

Among the many points of superiority may be mentioned the following essential characteristics of our make of billiard and pool tables

DOWELED SLATE BEDS
IRON BOLT CORNER SECTIONS
IRON LEG BOLTS
ROSEWOOD VENEERED CUSHION
RAIL TOPS
PATENT CUSHION RAIL BOLT CAPS

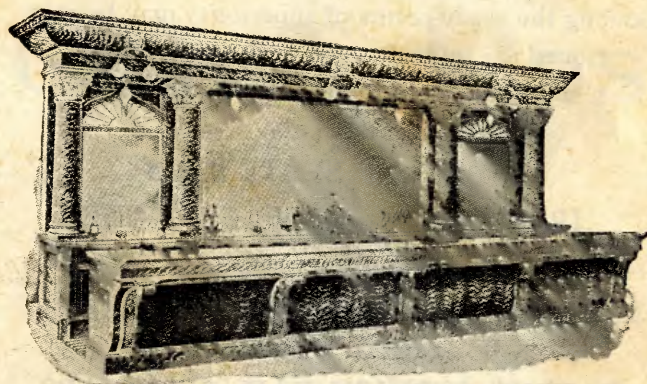

Manufacturers who are of the opinion that all of the little improvements embodied in our tables in the shape of **Re-enforcing Joints here and there, Steam and Atmospheric Seasoning of Wood, the many Hundreds of other little differences of construction** we make use of are not necessary, are lacking in experience. All billiard tables look alike to them on the outside.

For further particulars as to the utility of the various inventions embodied in the foregoing items please refer to our Billiard Table Catalogue. These items, it will be observed, are embodied in the actual construction of the table and are points that are not noticed by the casual observer.
